Kyle,

Could you follow up with Jim (today) and see how the state is responding?

Subject: contact for air

I have made the entire circle of contacts this morning trying to get someone to check air problems out here this morning. First Oneok local phone number has been disconnected- I called the Williston Fire Dept, got a contact number for them. Spoke with Oneok, they are not aware of any problems, but will have someone check the Bear Paw Compressor station, he suggested I contact Oasis, pssible source of the problem, so I am back a square one. I really don't care who is the cause, would someone please just fix it before I end up at the emergency room or it kills me and my cattle.
